PROFILE

Data Analyst with a M.Sc. in Computing (Dublin City University) who turns messy SQL and NoSQL data into clear, reliable dashboards teams actually use. Experienced across the full analytical lifecycle, building automated checks, keeping pipelines clean, and reporting directly to decision-makers, with a practical eye for auditing and validating modern AI outputs.

TECHNICAL SKILLS

- **Languages:** Python, SQL, R
- **Data Quality & Analysis:** Anomaly Detection (z-score / rolling baselines), Data Validation & Gap Analysis, EDA, Hypothesis Testing, Statistical Analysis, Predictive Modelling (XGBoost), SHAP
- **Pipelines & Integration:** ETL/ELT Pipelines, dbt, Kafka/Redpanda, API Integrations, PostgreSQL, MongoDB, MySQL, Snowflake
- **Reporting & Automation:** QA Automation, Report Generation, Dashboarding (Power BI, Tableau, Metabase, Streamlit), Documentation

EXPERIENCE

Data Analyst Intern Sep '26 - Present
Syntecxhub *Remote*

- Selected for a 1-month remote Data Analysis virtual internship, delivering a new hands-on project each week across the analytics workflow (cleaning, modelling, DAX, dashboarding).
- Building a public, portfolio-ready GitHub repository of end-to-end BI projects toward a verified Certificate of Completion.

Operations Associate (Part-Time) Nov '24 - Jun '26
Shuppa *Dublin, Ireland*

- Tracked operational KPIs (inventory, fulfilment, SLA compliance) in WMS data using SQL, Excel, and Power BI; audited stock-movement, error, and delay data for gaps and anomalies, improving fulfilment accuracy.
- Built and maintained daily/weekly performance dashboards, translating data quality findings into actionable recommendations for management in a live ecommerce/logistics operations setting.

Database Specialist Intern Dec '23 - Jun '24
Demos Centre for Research in Humanities *India*

- Audited MongoDB and MySQL datasets for data quality issues, tracing slow queries to root cause; improved reporting/query performance by 30% through schema optimization.
- Built and maintained Power BI and Tableau dashboards for 50+ users, keeping key metrics current for day-to-day, data-driven decisions across departments.

Software Development Intern Apr '23 - Sep '24
Kovid Bio Analytics Pvt. Ltd. *Pune, India*

- Built automated data collection, cleaning, and QA pipelines in Python to analyze 1M+ records, surfacing anomalies and gaps; delivered documented reporting with 95% client satisfaction.

RELEVANT PROJECTS

Amazon Customer Sentiment Analysis [Link]

- Cleaned 568K Amazon fine food reviews to 394K (Python, scikit-learn, VADER) and benchmarked a lexicon baseline against a TF-IDF logistic regression classifier, lifting macro F1 from 0.48 to 0.66 and showing negative reviews rising from 10.0% to 16.1%, driven by freshness and listing-accuracy complaints.

HR Analytics Dashboard: Employee Attrition Drivers [Link]

- Analyzed 1,470 employee records (Python, Power BI, DAX) using correlation testing to pinpoint attrition drivers. Overtime staff left at 30.5% vs. 10.4%. Built a two-page interactive dashboard with role-level retention recommendations.

Customer RFM Segmentation Analysis [Link]

- Cleaned 540K retail transactions to 392K line items across 4,338 customers (Python, Power BI, and DAX) and scored them into 11 RFM segments, showing Champions and Loyal Customers (27% of base) drive ~69% of revenue, with a retention action plan per segment.

Sales Performance Dashboard [Link]

- Cleaned a 10K-row raw retail dataset (Power BI, DAX), catching inconsistent date formats and a hidden duplicate record, then built a two-page interactive dashboard revealing that nearly 19% of orders were sold at a loss.

EDUCATION

M.Sc. Computing in Data Analytics 2024 - 2025
Dublin City University (DCU) *Dublin, Ireland*

- Key Modules: Statistical Data Analysis, Analytics & Mining, Machine Learning, AI. Practicum: Multimodal Fake News Detection with Explainable AI (SHAP).

M.C.A 2022 - 2024
MES Institute of Management & Career Courses (MES I.M.C.C.) *India*

B.B.A (Computer Applications) 2019 - 2022
MES Senior College *India*
